

The Inter-Pacific Bar Association invites you to a special webinar:

Telemedicine and Digital Health Data in Asia: Regulatory Trends or Gaps, and Issues

September 9, 4:00PM Manila • 5:00PM Japan
via Zoom

The IPBA's Technology, Media & Telecommunications Committee (TMT) brings you this webinar covering telemedicine and digital health data.

The so-called "virtual care boom" in the healthcare ecosystem has prompted the need for new or improved regulations to address the issues arising from new healthcare products and services, which come in all shapes and forms.

A speaker from the industry will share some pandemic-induced digital health trends and challenges, while the other panelists will cover the regulation of telemedicine and the handling of digital health data in their respective jurisdictions in Asia, namely the Philippines, Indonesia, India, and China.
